@jestruyo

--Computer and Software Engineer--

I'm passionate about technology and software development, driven by the mission to create innovative solutions that make a real impact. I love building web applications, automating workflows, and exploring the power of artificial intelligence and cloud computing. Every line of code is an opportunity to grow, learn, and drive meaningful change.

My goal is to contribute to the future of the tech industry by combining creativity, logic, and a deep passion for solving real-world problems.

2. English A2

--Achievements--

- At my current company, our team has successfully achieved platform stability—a goal set for the development department.
- I have developed low-cost technological solutions to address problems within my social circle.
- I brought to fruition my first AI-focused PaaS project for development teams.
- I drew on my experience and confidence to launch my first YouTube channel, where I share my knowledge while simultaneously improving my skills by studying new material and creating content.
